Licence Activation for GS05

Dear valued customer...

Thank you for purchasing a licence for our product. The following instructions will guide you through the licence activation process.

Please register your product at <https://myworld-portal.leica-geosystems.com/>, our internet platform for our customers. myWorld provides 24/7 access to all information you require to actively manage your equipment. Here, detailed information on individual products and their service history can be found. The information also aids in maintaining the product value while at the same time enabling maximum efficiency and productivity.

First time licence activation

The GS05 is delivered with all purchased licenses not yet activated.

You must connect the GS05 to the Internet for the initial license activation.

1. Turn on the GS05.
2. Connect to a CS20 controller or Leica Captivate tablet.
3. On the controller or tablet:
Go to **Settings/Connections/All other connections/GS connections/GS WLAN** and configure **GS WLAN** to establish an Internet connection.
OR
Go to **Settings/Connections/All other connections/GS connections/GS internet** and configure **GS internet** to establish an Internet connection.
4. Once the Internet connection is established, the licences will get activated immediately.

Subsequent licence activation

This section is relevant when ordering new licenses for an instrument that you already have in use. All new licenses will be immediately activated after following one of these three actions:

1. After GS05 startup
2. After re-connection to the Internet
3. Every hour while the device is connected to the Internet.

In case license activation fails...

EITHER

- contact your local Leica Geosystems representative.

OR

- create a new support request on <https://myworld-portal.leica-geosystems.com/> that will be answered by your local Leica Geosystems Support Team.
