

Solatech Software & Leica Disto Laser Measuring Tools **A partnership for the window coverings professional**

Solatech, the World Leader in Window Fashion Software was the first in our industry to partner with Leica and offer a truly integrated Bluetooth Laser Measuring Device coupled with a full featured in home Point of Sale tool for the window fashion professional. The Solatech SalesPRO is a powerful tool designed to allow anyone to quickly measure and record accurate window dimensions.

Using a Leica Bluetooth Equipped Disto and our powerful laser measuring device (LMD) Quick Entry program, one can measure windows in a home or commercial building in a fraction of the time, with no errors. Our newest software feature allows the user to take three width and height measurements and save either the longest or the shortest measurement automatically. No more mental calculations

required – our software takes the guesswork out of measuring and errors out of recording your measurements. And since pricing and product validation for all of the major window covering manufacturers is included in our Solatech software, it also eliminates the need for bulky price books. With our SalesPRO system, you can accurately measure, price and quote an entire house in ½ the time. You can also quote a project in four different configurations in less than 5 minutes and generate all of your paperwork (invoices, customer confirmations, p.o.'s, packing lists, etc.) BEFORE you leave the appointment, saving you hours a day.

Solatech's dynamic window covering software paired with Leica's Bluetooth Disto gives you the ultimate competitive advantage in today's marketplace. For more information on our products, view our YouTube video on our products at www.Solatech.com/sales.asp or contact us via e-mail at sales@solatech.com or toll free at 1-877-994-TECH (8324).
